The Solitude and Serenity of Nature An Osprey in Flight with a Fish Photographed by Bob Scully May 10, 2021 at the Agawam Herring Run

In the category 'The Solitude and Serenity of Nature,' our winning photo was taken by Bob Scully. The photo features an osprey in flight with a fish. Bob frequently visits the Agawam Herring Run when the osprey arrive in the spring. He said that "it's a great place to get pictures. These types of pictures are like the pinnacle of osprey pics."

Bob said that osprey are his favorite migratory birds, and he has been a member of Osprey Watch in Wareham, monitoring the Narrows Crossing nest for the past two years.

People Enjoying the Land Little Fish in a Big Pond Photographed by Miranda Davis June 30, 2020 at Parkwood Beach

In the category "People Enjoying the Land," our winning photo was taken by Miranda Davis. The photo features Wareham resident Max Santi (age 2). When asked what her inspiration was for taking this photo, Miranda said that she wanted to highlight "playful moments in everyday life." She took this photo while looking after Max, and she captured the moment to "look back at small moments of play to remind yourself of how important these

brief moments truly are." Parkwood Beach is a special place for Miranda because she has many fond memories there, including beach days with children and kayaking with friends. She looks forward to the many more adventures at Parkwood Beach.

A Few of Nancy's Favorite Things

Asking me "What was your favorite WLT project over the last 20 years?" is like asking a parent to pick a favorite child. I simply can't do it. Each of the 682 acres that was unprotected in 2001 and is protected now is special! While the projects all have three things in common (a willing seller/donor, a willing buyer/grantee and a committed team who brought the two together), they are all very different. Some, like the 68 acre Agawam Pine Barrens, are difficult to access and serve primarily to provide habitat protection. Others, like the 4 acre Agawam River Trail, are in neighborhoods and are easily accessible for walking and kayaking (in addition to being a turtle nesting site.)

Because I have had the honor of being Treasurer for most of the 20 years, I have been involved to varying degrees in every transaction. Each of the 17 properties owned by the WLT and the 18 Conservation Restriction properties have their own stories. There are stories of families that are fiercely loyal to memories of wonderful childhoods spent playing in the woods or on the beaches, and stories of newcomers who want desperately to protect the jewel they have discovered here in Wareham. Some of the projects took years, multiple partners and millions of dollars to complete, such as the CRs surrounding the Great Neck Wildlife Sanctuary. Other properties took only the stroke of a pen and the recording of a deed, thanks to a donor's generosity.

I look back very fondly at the 35 projects and remember the friends I made. Each one has enriched my life in ways too numerous to count. Together, we have worked to ensure that the environment we dearly love is protected for future generations. Thank you for allowing me to go on this amazing journey with you.

Go forth and explore the properties!

TAREHAM LAND

The Wareham Land Trust-Then and Now

The first opportunity to conserve land came right away. A 66-acre parcel along the Weweantic River was for sale. Two WLT board members went to New York and negotiated a price with the owner. With both private and state funding, the Town acquired the Fearing Hill Conservation Area, now permanently protected by a conservation restriction held by the WLT.

The WLT, working with private and public partners, has permanently protected over 680 acres. Today, over 17% of Wareham's land is permanently protected, compared with about 3% when WLT started.

While that sounds good, there is much more work to be done! The Wildlands and Woodlands initiative advises keeping at least 70% of land as forests and at least another 7% in agriculture to ensure a healthy future.

Last year, the Land Trust Accreditation Commission renewed WLT's national accreditation for another five years. This is a noteworthy accomplishment for an Volume 18 No. 1 Summer 2021

all-volunteer board.

With our growing responsibilities, the WLT plans to hire its first executive director to increase the pace of this important work.

We are grateful for WLT's hardworking Board, our supportive members, our conservation partners, and the Town of Wareham for investing in saving land for future generations.

Sharing One Big Beautiful Backyard

consider myself extremely fortunate to live in a community with such diverse natural beauty. As an Onset resident, I frequently enjoy hopping in the kayak and exploring the numerous coves. When I joined the WLT in 2016, I was pleasantly surprised to discover that we also have many opportunities to hike in the woods too! Exploring the many trails found on WLT protected lands brought back a flood of childhood memories, as we were out on trails almost every day growing up in western PA. Some of these WLT properties also have water access to paddle on the local rivers, giving us a whole new experience beyond the many small coves we've come to love in town.

Since joining the WLT, I've been active on their Board and Outreach Committee in an effort to help spread awareness of this amazing access to nature, and to help protect what makes our town so special. Being all-volunteer, the WLT members are the heart of the organization.

I'd encourage everyone to take a break from the bustle of our lives and enjoy the natural beauty around us. And please consider taking a more active role in the WLT organization. You can volunteer to help with land stewardship, trail maintenance and outreach (contributing with events, writing material for social media/ web blogs and more.)
